OTA new Opera House has been completed in New Orleans, containing seats for twenty-five hundred' persons, besides plenty of standing room.

A British officer writing from Teheran, Pereis, to the London Times, remarks: "A Cathartic Pill, manufactured by an American chemist, (Dr. J. C. AYER, of Lowell, Mass .) has cured the Shah of a Liver Complaint that threatened his life. This simple fact, as might be expected, renders the Americans immensely popular here, while we English are overlooked. Doubtless our own scholars made the discoveries which he employs, and thus it is in everything: we do the labor, then the mousing Americans put their mark on it and take the reward.—
Doct. Ayer is idolized by the Court and its reminers here, which will doubtless be reflected to him on a gold enuff box or dia mond hilted sword, while not the name even of Davy, Christosom or Brodie-the great

The "Floyd."

York Sunday Paper.

The cesting of this moneter gun has been a complete success. After a thorough cooling, it was raised from the pit in which it was cast, last week; and so tar as a complete externol examination goes, the casting is without's flaw. The services of twenty COOKING. men, with two immerise cranes and a pow ertal screw, were required to bring this im mense mass of fron to a level with the floor of the foundry. On Saturday, when we paid a brief visit to Messra. Knap, Rudd & Co.'s establishment, it was being moved slowly towards the lathe, where it is to be of a railfood track, and a movable iron to d, the following: with pullies and tackles. Mr. Joseph Kay, (still on crutches from the recent accident,) estell on crutches from the recent accident,) mical stove manufactured. superintends the mechanical operations.-The hendling of seventy five thousand pounds of iron, in one solid mass, is no slight job. It is well said that theavy bodies move slow," and the progress of this gun, along its iron ways, is an admirable illustra tion of this fact, nevertheless, the "Floyd" moves faster than Congress and may possi-bly throw a five hundred pound ball from old Point Comfort before that body, com-posed of the heavy metal of the nation, is organized.

The PRESIDENT is the best farmer's stove in ex-istence, it being one of the latest patterns and made very heavy and durable. The dampers are arranged so that the heat passes directly out of the pipe whon pot baking, which is a great convenience in warm organized.

The metal from which the Floyd is cast was made at the Bloomfield furnace, and has stood stronger tests than any other one we know of.

Major Wade informs us that the firm have recently received an order from the government for fifty or sixty guns of large size, which are now being cast. The guns cast by Messrs. Knap, Wade & Co., and their successors, Messrs. Knap, Rudd & Co., have stood the most trying tests, and have been pronounced by the military men of the country superior to all others.

While the Floyd was being raised from the pit, the working force of the foundry were placed en tableau, and a photograph ta-ken of the interior of the establishment, which makes an interesting and highly characteristic picture. When the big gun shall have been placed in position in the lathe, and others of a smaller size are being turned in smaller lather, it is the intention of the proprietors to have a complete photo-graphic picture of the entire operations ta-

The successful making of such a gwh at the "Floyd," as well as the known superior-ity of the large number of guns which have already been cast at this establishment, proves the wisdom and sagacity of Secretary Floyd, in selecting Pittsburgh as a place for the casting of large ordnance for the government .- Post.

execution of these engravings; and the length of time employed upon them renders \$1200 a moderate estimate."

FILIAL AFFECTION-SUN-The prict bearing this title represents a scene in front of a farmer's homestead, and in the distance, viewed through the open gate, is a church; while on the road between, are groups obviously tending thitherward. The party in the foreground are engaged in preparations for departure towards the same nearen-pointing spire; and a beautiful girl of about sovesteen summers, waits, Bible in hand, by the garden gate, holding it open for the egress of the family, and smiling on the lafant. The mother, still hand-some, attends on the aged grandfather, adjusting with affectionate care a serchief to protect him from cold; while he, seated upon a donkey, supports the young est child in front of him. Three other children are necupled, one in sport with a dog, and the older ones in receiving instruction from the farmer himself, who is seated by the doorstead. An agod oak spreads its protecting arms over them all.

ED FROM MARKET. DAY MORNING.

The market-cart has returned from the lown, bearing a rich freight of purchases to the delibited young-copie, who are receiving them with eagerness. The farmer's wife, not yet descended, has, with one hand, passed a gay new bonnet from the open bands, box on her lap, to the miss in her teens, whose easters yof admiration is unmistakable. The other she eaving, who, with lay, seems ready to apring from the arms of its fondling grandmother. The old gentleman, seated on the pinza, is in the act of adjusting his spectacles for the immediate perusal of the fresh newspaper apread on his knee; while the small boy and his sister are diving into the mysteries of the baseket of new crockery, and other household gear, for gingerants and other delectable condiments. The farmer is seen carrying a heavy basket up the steps of the porch. In the shadow which it throws we need coming events, for there pussy stealthily moves down on a brood of chickens to young as to be still visy like egge.
